PROFESSIONAL SUMMARY

Full Stack Developer with hands-on professional experience building and maintaining web applications on the MERN stack (MongoDB, Express.js, React.js, Node.js). Comfortable across the full development cycle — responsive UIs, REST APIs, authentication flows, and third-party integrations such as payment gateways. Strong foundation in Java (OOP, Collections, Exception Handling) and SQL. Seeking a Full Stack / Java Developer role to apply solid fundamentals and grow into larger-scale production systems.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Java, SQL
- **Frontend:** React.js, Redux Toolkit, React Router, HTML5, CSS3, Tailwind CSS, Axios
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** MongoDB, SQL
- **Java:** OOP (Inheritance, Polymorphism, Abstraction, Encapsulation), Collections, Exception Handling, Multithreading
- **Tools & Platforms:** Git, GitHub, VS Code, Firebase Authentication, WordPress
- **AI Tools:** Claude, Claude Code, ChatGPT, Google Gemini, Antigravity

WORK EXPERIENCE

Full Stack Web Developer — Nashi Informatics Solutions Pvt. Ltd.

Nov 2025 – Present

- Build and maintain web application features using React.js, Node.js, and Express.js as part of a full stack development team.
- Develop across the stack — from responsive UI components to REST API endpoints — in a production codebase.
- Debug and resolve issues across frontend and backend layers to keep the application stable and performant.
- Collaborate through Git/GitHub using code reviews and feature-branch workflows.

PROJECTS

Block-Based Coding Platform | JavaScript (ES6+), React, Blockly, Axios, HTML5, CSS3

- Developed frontend features for a visual programming IDE that lets students build robotics programs from drag-and-drop blocks, shipped to web, Android, and iOS from a single codebase.
- Built custom hardware blocks and their Python code generators (I2C, SPI, servo, sensors), along with the selection modals and toolbox categories that expose them to users.
- Implemented the complete authentication flow — sign-up, login, password reset, guest mode with route guarding, and user profile — integrated with backend REST APIs using Axios.
- Created browser-based AI training screens (image, voice, pose, and gesture) that let users train a model and apply it directly inside the block workspace.

Rabbit – E-Commerce Web App | React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, PayPal | [GitHub](#)

- Built a responsive clothing store UI in React.js and Tailwind CSS: product listing, details, cart, checkout, and order history.
- Implemented URL-synced product filters (category, size, color, brand, price) and sorting with React Router search params.
- Integrated PayPal checkout and built a slide-out cart drawer, mobile navigation, and a drag-to-scroll product carousel.
- Currently building the REST API with Node.js, Express.js, and MongoDB, and global cart/auth state with Redux Toolkit.

Rosewood Bakery Website | HTML5, CSS3, JavaScript

- Developed a responsive 5-page bakery website where the menu, prices, hours, and reviews all render from a single data file.
- Added live product search, category filters, and WhatsApp ordering through a validated form that pre-fills the order message.
- Created scroll animations (parallax hero, IntersectionObserver reveals, progress bar) and a persistent light/dark theme.
- Made the site accessible (ARIA, keyboard navigation, skip link) and SEO-ready with Open Graph tags, JSON-LD, and a sitemap.

CERTIFICATIONS

- Programming in Java — NPTEL
- Full Stack Development — Wipro

EDUCATION

B.E., Computer Science and Engineering | CGPA: 7.4

2021 – 2025

Nehru Institute of Engineering and Technology, Coimbatore

Higher Secondary & Secondary Education — Govt Higher Secondary School, Eriyur, Sivagangai

LANGUAGES

Tamil (Native) | English (Professional Working Proficiency)
