PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building and maintaining scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Also having the knowledge of Java OOP concepts (Inheritance, Polymorphism, Abstraction, Encapsulation), Collections and Exception Handling along with SQL for database problem-solving. Comfortable across the full development cycle — building responsive UIs, REST APIs, and integrating third-party services. Seeking a Full Stack / Java Developer role to apply strong programming fundamentals and grow into larger-scale production systems.

TECHNICAL SKILLS

- **Core Languages:** JavaScript (ES6+), Java
- **Java Concepts:** OOP (Inheritance, Polymorphism, Abstraction, Encapsulation), Collections, Exception Handling, Multithreading
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Redux
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** SQL, MongoDB
- **AI tools:** Claude ,ChatGPT, Google Gemini
- **Tools & Platforms:** Git, GitHub, VS Code, WordPress, Firebase Authentication, Claude code, Antigravity

WORK EXPERIENCE

Full Stack Web Developer — Nashi Informatics Solutions Pvt. Ltd.

Nov 2025 – Present

- Build and maintain web application features using React.js, Node.js, and Express.js as part of a full stack development team.
- Collaborate with team members using Git/GitHub for version control, code reviews, and feature branching workflows.
- Work across the stack — from responsive UI components to REST API endpoints — gaining production-level experience beyond personal projects.
- Debug and troubleshoot issues across frontend and backend layers to ensure smooth application performance.

PROJECTS

Block-Based Coding Platform | *JavaScript (ES6+), Blockly, React , HTML5, CSS3, Axios*

- Developed frontend features for a visual programming IDE that lets students build robotics programs from drag-and-drop blocks, shipped to web, Android and iOS from a single codebase.
- Built custom hardware blocks and their Python code generators (I2C, SPI, servo, sensors), along with the selection modals and toolbox categories that expose them to users.
- Implemented the complete authentication flow — sign-up, login, password reset, guest mode with route guarding, and user profile — integrated with backend REST APIs using Axios.
- Developed browser-based AI training screens (image, voice, pose, and gesture) that let users train a model and apply it directly inside the block workspace.

To-Do List App | *React.js, HTML, CSS, JavaScript*

- Developed a responsive task-management app with create, update, complete, and delete functionality.
- Implemented user authentication (login/signup) so each user has a personalized, persistent task list.

CERTIFICATIONS

- Programming in Java — NPTEL Certification
- Full Stack Development — Wipro Certification

EDUCATION

B.E., Computer Science and Engineering

Nehru Institute of Engineering and Technology, Coimbatore | 2021 – 2025 | CGPA: 7.4

Higher Secondary & Secondary Education — Govt Higher Secondary School, Eriyur, Sivagangai

LANGUAGES

Tamil (Native) | English (Professional Working Proficiency)
